

N! UNITED against COVID-19

Dear Friends,

We are all aware of the impact of Coronavirus (COVID-19). It is a human tragedy on an immense scale. Wherever it has broken out hundreds of thousands of people, if not millions, have had their lives disrupted, their health threatened.

Around the world countries, and in particular their national health services, are struggling to cope. Among these is Italy, where Bergamo near Milan is a city under siege from this infectious disease.

One of the founding principles of the **NEXUS** Community is that we help each other. Normally it is for business. But in these unprecedented times this is a humanitarian issue.

N! UNITED: NEXUS for humanity

NEXUS has launched its first **N! UNITED** initiative, together with the help of **NEXUS** Automotive ITALY and **BREMBO** and we will donate 20K surgical masks to the Papa Giovanni XXIII hospital in Bergamo, in order to protect the consultants, doctors and nurses who are putting themselves at risk to help those with COVID-19.

It is our intention to follow up on this first initiative with a similar initiative in Spain, together with the help of **N!** Member IDAP. And we are considering similar humanity initiatives for other areas where help is so much needed.

If you would like to support and contribute towards to this important human project, you can contact us by nexusunited@nexusautomotive.eu: any kind of support, suggestions or donations are welcome and help Europe to find soon a solution for this immense human crisis!

Note that we are extending this invitation not just to **N!** Members and Suppliers but also to the wider aftermarket / automotive community.

Together we can be **N! UNITED** against Coronavirus!

Warm regards, stay safe!
